THE RANGE

CONSTRUCTION SOLUTIONS

01 CONCRETE COATINGS

Sealers, surface hardeners, densifiers and decorative finishes.

02 RELEASE AGENTS

Formwork release, tilt-up bond breakers and precast mould release.

03 SURFACE RETARDERS

Controlled aggregate exposure and construction joint preparation.

04 SPECIALTY CLEANERS

Concrete removers, wash-down products and targeted stain treatments.

05 ADMIXTURES

Bonding agents, mortar plasticisers and concrete mix modifiers.

06 WATERPROOFING

Liquid-applied membranes and bitumen-based protective coatings.

FROM THE POUR TO LONG-TERM PERFORMANCE

ACRYLIC SEALERS

COLORO acrylic sealers protect and enhance concrete, pavers, exposed aggregate and other suitable masonry surfaces. Choose finishes from matte to satin and high gloss, with colour tint options for decorative work.

KEY FEATURES

- Enhances the colour and finish of decorative concrete.
- Helps resist water, staining, dirt and weathering.
- UV-resistant options for exposed applications.
- Matte, satin and high-gloss finishes across the range.
- Practical spray or roller application options.

FEATURED SOLUTIONS

SAMEDAY
For selected new-concrete work

HIGH BUILD
Decorative exposed aggregate

HARD SEAL
General-purpose concrete sealer

SELECTED PRODUCTS

COLORO®

TINT BASE & TINT PACKS

Create custom COLORO acrylic colours with a simple tinting system.

COLORO COLOUR TINT RANGE

Light Grey | Shale Grey | Charcoal | Black | Bluestone | Monument | Terracotta

**Indicative colours only. Actual results may vary by substrate and application.*

KEY FEATURES

- Custom colour flexibility
- Consistent mixing system
- Professional finish

Tint Base | Tint Pack | 7 Colour Options | Designed For Use Together

SURFACE HARDENERS

The COLORO ARMACRETE family includes penetrating densifiers and surface treatments that strengthen concrete and reduce surface porosity. Designed for commercial, industrial and high-traffic concrete floors.

KEY FEATURES

- Improves surface density and abrasion resistance.
- Reduces surface porosity and dusting.
- Selected formulations help resist moisture ingress.
- Penetrating systems work within the concrete matrix.
- Long-term performance with reduced maintenance.

FEATURED SOLUTIONS

FINAL FINISH 500
Densifier + liquid repellency

ARMACRETE SDK
Silicate surface treatment

ARMACRETE C2
Colloidal silica densifier

SELECTED PRODUCTS

PENETRATING SEALERS

COLORO penetrating sealers protect porous substrates against moisture and everyday contaminants while retaining the character of the surface. Select a product to suit the substrate, desired appearance and exposure conditions.

KEY FEATURES

- Penetrating protection against water ingress.
- Suitable options for concrete and masonry surfaces.
- Helps minimise staining and efflorescence.
- Breathable treatments available in the range.
- Low-maintenance protection without a heavy coating.

FEATURED SOLUTIONS

ENHANCE
Enhanced appearance

SHIELD PLUS
Stain protection

SILICONE WATER REPEL
Natural-look repellency

SELECTED PRODUCTS

CONCRETE RELEASE

COLORO release agents and bond breakers are designed for controlled separation of concrete from formwork, casting slabs and moulds. Correct selection helps improve surface finish and efficient demoulding.

KEY FEATURES

- Solutions for steel and timber formwork.
- Dedicated bond breakers for tilt-up construction.
- Products for precast and repeat mould release.
- Water-based and oil-based formulations available.
- Supports clean stripping and formwork reuse.

FEATURED SOLUTIONS

LANO-LEASE
Lanolin-based form release

BREAK & CURE
Tilt-up panel bond breaker

FORM RELEASE
Formwork and mould faces

SELECTED PRODUCTS

THE RIGHT RELEASE AGENT.
FOR THE RIGHT CASTING PROCESS.

01 FORMWORK

FORM RELEASE AGENT

Clean stripping from formed concrete

Applied to timber, steel or other form faces before a pour to help concrete release cleanly and allow forms to be reused.

02 TILT-UP PANELS

TILT PANEL BOND BREAKER

Separation for panel lifting

Applied to casting slabs before panels are formed. A dedicated bond breaker helps the cured panels separate for lifting.

03 PRECAST

MOULD RELEASE AGENT

Repeatable demoulding

Applied to mould faces or casting tables for efficient release, cleaner production and reduced concrete build-up.

SELECTION MATTERS Match the release agent to the casting surface, required finish and construction method. Follow the current product data sheet.

XPO PERFORMANCE

COLORO XPO surface retarders provide controlled surface set-back for exposed aggregate finishes and construction joints. The range includes high-visibility FLUORO and a gel formula for vertical and detailed work.

KEY FEATURES

- Designed for exposed aggregate finishing.
- Options for horizontal construction joints.
- VERTI-GEL for vertical faces and detailed joints.
- High-visibility treatment on selected products.
- Supports consistent, controlled surface exposure.

FEATURED SOLUTIONS

XPO FLUORO
High-visibility surface retarder

XPO100
Horizontal concrete work

VERTI-GEL
Vertical and joint surfaces

SELECTED PRODUCTS

SPECIALTY CLEANERS

Construction clean-up calls for the right chemistry. The COLORO cleaner range covers hardened concrete deposits, panel wash-down, efflorescence and selected stain-removal applications.

KEY FEATURES

- Concrete and curing compound removal options.
- Targeted products for efflorescence treatment.
- Heavy-duty degreasing and panel washing.
- Solutions for rust, tannin and bore-water stains.
- Concentrated and ready-to-use formats.

FEATURED SOLUTIONS

CONCRETE ASSASSIN
Concrete deposits and residue

PANEL WASH
Equipment / panel cleaning

SPITSER
Targeted stain removal

SELECTED PRODUCTS

CONCRETE ADDITIVES

From bonding agents to mortar plasticisers, COLORO and Brickies Mate additives support better workability, adhesion and consistency in cementitious construction and repair applications.

KEY FEATURES

- Bonding solutions for suitable concrete repairs.
- Improved workability in mortar and render mixes.
- Mix modifiers for specific construction needs.
- Options that help improve mix consistency.
- Products for masonry, concrete and repair work.

FEATURED SOLUTIONS

BOND MAX
PVA / SBR bonding additives

LIQUID LIME
Lime replacement for mortar

BRICKIES MATE
Mortar plasticiser concentrate

SELECTED PRODUCTS

WATERPROOFING

COLORO waterproofing products include polyurethane-modified, liquid-applied membranes and bituminous protective coatings for approved substrates and applications. Choose the system according to exposure, detailing and project specifications.

KEY FEATURES

- Helps protect structures against moisture ingress.
- Flexible membrane options for substrate movement.
- WPU100 and WPU200 are Class III membrane options.
- Applicable WPU systems are designed to AS 4858.
- Water-based bitumen coating options available.

FEATURED SOLUTIONS

BLACK MAX 3
Bitumen protective membrane

WPU100 - UV
UV-stable non-fibre membrane

WPU200
Fibre-reinforced membrane

PERFORMANCE
YOU CAN SPECIFY

SCAN THE RANGE

WWW.COLORO.COM.AU

LOW VOC & LOW ODOUR

Lower-emission options for selected construction applications.

- Low-VOC formulations where specified
- Low-odour products where applicable
- Current product TDS and SDS available

GREEN STAR PROJECT SUPPORT

Product data that may support project sustainability assessments.

- VOC attributes documented by product
- Relevant PDS evidence for selection
- Project eligibility must be checked

AUSTRALIAN MADE & QUALITY

Locally manufactured construction chemistry for Australian conditions.

- Australian-owned manufacturing
- Consistency and technical expertise
- Responsive local product support

STANDARDS & DOCUMENTATION

Product-specific evidence to assist technical specification.

- Class III WPU membrane options
- AS 4858 where documented
- TDS, SDS and supporting test data

Claims, standards and certifications vary by formulation. Confirm current product documentation, project requirements and the applicable certificate or test report before specifying.
